Recruitment profile: Engineering – Junior product designer

Do you also believe in a future where both man and nature can thrive together? Where we can feed ourselves without depleting nature? Then you are the perfect match to join us in accelerating the transition to a food system in balance with nature. For our new production facility we are looking for engineering talents who want to join us in leading the 'ento-revolution'.

About Protix

We are at the eve of forming an insect industry. Protix is a rapidly growing company and leading this "ento-revolution" as the frontrunner in the industry. Working at Protix is an excellent opportunity to excel both personally and professionally in a fast-paced entrepreneurial environment.

Job description

As junior designer you will support the engineering team by detailing ideas and translating sketches into detailed 3D designs and 2D drawings. You participate in the design process for the different projects. You have knowledge of fabrication technologies for series production (especially in injection molding and welding technology). Furthermore, you'll be responsible for requesting quotations at potential suppliers. Questions regarding the design and quotation requests will pass through you primarily.

Key performance objectives

- Independently detail sketches, ideas and concepts into 3D CAD models, mainly for our internal projects
- Detail these models into 2D fabrication drawings
- Perform technical calculations and evaluate technical feasibility
- Make comparisons between different designs, based on – amongst others - feasibility, price and sustainability
- Maintain relations with potential suppliers, negotiate prices, lead times and technical specifications of the quotations
- Present design considerations which lead to the correct supplier in a clear and orderly manner

Minimum experience / education qualifications

- 'MBO' mechanical engineering, or industrial product design (or comparable) with at least 5 years of experience
- Or a BSc. degree in mechanical engineering or industrial product design (or comparable)
- Good written and oral communication skills in English
- Knowledge of, and skill in 3D CAD software (Solidworks)
- General computer literacy as MS Office

General skill and qualifications

- A general interest in nature and technology
- No nine-to-five mentality
- Hands on approach
- Strong communicator
