Recruitment profile: Procurement Officer

Do you also believe in a future where both man and nature can thrive together? Where we can feed ourselves without depleting nature? Then you are the perfect match to join us in accelerating the transition to a food system in balance with nature. For our new production facility we are looking for engineering talents who want to join us in leading the 'ento-revolution'.

About Protix

We are at the eve of forming an insect industry. Protix is a rapidly growing company and leading this "ento-revolution" as the frontrunner in the industry. Working at Protix is an excellent opportunity to excel both personally and professionally in a fast-paced entrepreneurial environment

.Job description

As Procurement Officer you will be part of the Projects and Engineering team at Protix and will offer vital support to the Project team. For the realization of our new facility, we are looking for an experienced Procurement Manager to manage the supply of products and services. This includes everything from supply of raw materials and energy contracts to plant equipment and construction contractors. Procurement Manager responsibilities include strategizing to find cost-effective deals and suppliers, contracting and fulfillment.

Key performance objectives

- Active engagement with engineering team to understand needs, risks and opportunities
- Devising and using fruitful procurement and sourcing strategies
- Discovering profitable suppliers and initiate business and organization partnerships
- Apply a 'total cost of ownership' mindset in negotiations and agreements with suppliers. Service and maintenance and internal cost throughout the lifecycle are an essential part in this.
- Negotiating with external vendors to secure advantageous terms
- Approve the ordering of necessary goods and services
- Finalize purchase details of orders and deliveries
- Track and report key functional metrics to reduce expenses and improve effectiveness
- Collaborate with key persons to ensure clarity of the specifications and expectations
- Perform risk management for supply contracts and agreements
- Perform additional duties and assignments as requested.

Minimum experience / education qualifications

- Minimum 5 years proven working experience in procurement, engineering or similar
- Experience with large capital projects in feed, food or process industries is a pre
- Knowledge of sourcing and procurement techniques as well as a dexterity in "reading" the market
- Strong network in manufacturing, climate, processing, warehousing suppliers is a benefit
- BSc degree in supply chain management, logistics, engineering or business administration

General skill and qualifications

- A genuine interest in nature and technology
- Talent in negotiations and networking. Strong relationship management with suppliers is key.
- Aptitude in decision-making and working with numbers
- No nine-to-five mentality
- Ability to assume responsibility, interface and communicate effectively with others a must
- Must be proficient in MS Office
