Recruitment profile: Entomologist

Do you also believe in a future where both man and nature can thrive together? Where we can feed ourselves without depleting nature? Then you are the perfect match to join us in accelerating the transition to a food system in balance with nature. We are looking for top talent who want to join us in leading the 'ento-revolution'.

About Protix

We are at the eve of forming an insect industry. Protix is a rapidly growing company and leading this "ento-revolution" as the frontrunner in the industry. Working at Protix is an excellent opportunity to excel both personally and professionally in a fast-paced entrepreneurial environment

.Job description

Protix R&D is hiring an entomologist with experience in cultivation of insects in an industrial or academic setting. You will be responsible for uncovering drivers of insect behaviour and growth and translating these with the R&D team into solutions for production and engineering. There are opportunities in this position to publish research on safety and sustainability, and to present at conferences.

Applicants should be prepared to describe in detail work they have done to resolve issues in insect production or to uncover drivers of insect behaviour. Acceptable forms of description might be discussing published research results or providing a case study from their production experience.

Key performance objectives

- Strain characterization of cultivated species
- Research and development on the breeding and rearing process
- Consult on quality management

Minimum experience / education qualifications

- Experience growing insects
- Background in entomology

General skill and qualifications

- A genuine interest in nature and technology
- Demonstrated ability to resolve issues that arise in insect production or uncover drivers of insect behaviour.
- Willingness to travel a few times a year.
- The working language in Protix R&D is English and this position is open to non-EU citizens with qualifying skills.
