Composition	
Moisture:	0.25%
Free fatty acid:	1.5%
Lauric acid:	43%

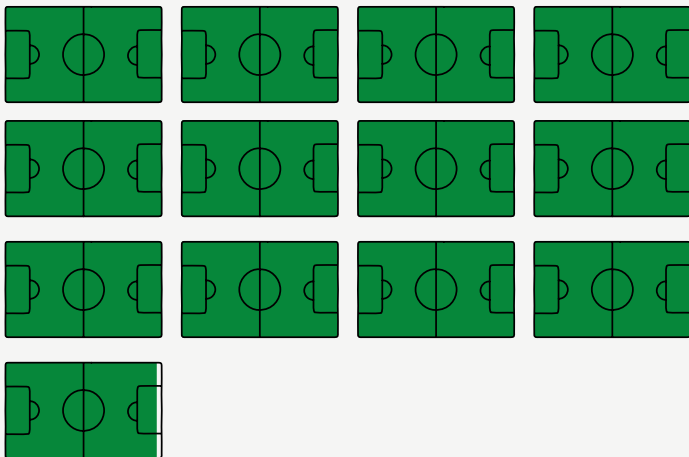

Good for pets,
Good for the
planet

Return over
12m² of land
to nature with
each kilogram
of lipids.

For each kilogram of lipids, 12.08 m² of land can be saved by replacing the coconut oil often used in livestock feed and pet food with LipidX. 93% of the land can be returned to nature by switching to insect-based fats.

Coconut oil
12.98 m² land use

13x less land use

LipidX insect fat
0.898 m² land use
